Week 2:

Day 4— Task 3

Question:

3. Employee Payroll System

Objective

Create an abstract class Employee.
Derived classes PermanentEmployee and ContractEmployee override salary calculation.

Input

- Employee Type: Permanent

Output

- Salary: 50000

Program (EmployeePayrollSystem.py):

```
from abc import ABC, abstractmethod

class Employee(ABC):

    def __init__(self, emp_type):

        self.emp_type = emp_type

        self.salary = 0

    @abstractmethod

    def employee_type(self):

        pass

class Permanent_employee(Employee):

    def __init__(self, emp_type):

        super().__init__(emp_type)
```

Nivetha (CSBS)

```
        self.salary = 50000

    def employee_type(self):
        return self.emp_type

    def calculate_salary(self):
        return self.salary

class Contract_employee(Employee):
    def __init__(self, emp_type, working_hours):
        super().__init__(emp_type)
        self.working_hours = working_hours
        self.salary_per_hour = 500

    def employee_type(self):
        return self.emp_type

    def calculate_salary(self):
        self.salary = self.working_hours * self.salary_per_hour
        return self.salary

emp_type = input("Enter the employee type (Permanent/Contract): ")
if emp_type.lower() == 'permanent':
    emp1 = Permanent_employee(emp_type)
    print('Salary: ', emp1.calculate_salary())
elif emp_type.lower() == 'contract':
```

Nivetha (CSBS)

```
working_hours = int(input("Enter the working hours: "))
emp1 = Contract_employee(emp_type, working_hours)
print('Salary: ', emp1.calculate_salary())
```

Output:

```
PROBLEMS 1   OUTPUT   DEBUG CONSOLE   TERMINAL   PORTS   Python
